Copy 4 of 10

18 November 1958

The Ramo-Wouldridge Corporation  
Los Angeles, California

Gentlemen:

This letter is undertaken to establish for the record understandings of the past 6 months. It covers work being performed or to be performed under a number of contracts and is set forth below:

Contract No. A-101: Amendment No. 18 is now being written and will be the last amendment under this contract. We assume that no overruns will occur on this contract but if this is not the case, we expect to be advised immediately so that proper outbacks may be effected in order to keep within the dollars allocated for the work.

Contract No. A-102: Amendment No. 4 is presently in process and adds additional dollars to cover unit system environmental and flight testing on System 4 and the rework of System 4, Serial 102, for Customers 1 and 2. This work increases Customer No. 1 funding by \$365,396 and Customer 3 funding by \$296,881.

Contract No. HF-CT-699 (new Call-Type contract):  
This contract provides \$20,000 to cover spare parts and related items. It is anticipated that additional dollars will be required under this contract as orders are placed. Work under your CDDC Document No. 151X5.1148 will be authorized under this contract.

Our previous agreement was that monthly the undersigned would be furnished cost information in order to determine the present status of funding under the contract. The last such data was furnished by you on 31 May 1958. Please furnish each month the costs incurred to date and the costs to be incurred to complete the work so that we will know exactly the status at all times. Even though Contract No. A-101 will soon be completed, this does not diminish the urgent need for this type of data.

You are further cautioned against expending funds on the following proposals until formal approval is received: CMC Doc. No. 151X5.1222, 151X5.1273, 151X5.1148, and 151X5.1160.

It is requested that you reply to this letter as soon as possible in order to indicate your understanding therewith.

Very truly yours,

25X1A

  
Contracting Officer
